Summary

I specialize in creating modern web applications as a front-end developer, using Next.js, React, TypeScript and Tailwind CSS. My primary focus is on designing user-friendly interfaces and responsive layouts. By prioritizing the creation of modern web applications, I demonstrate my commitment to staying at the forefront of technology.

Experience

Pyfox Technologies

September 2020 - October 2021

Software Engineer

At Pyfox Technologies, I contributed to two major e-commerce projects, showcasing my versatility in full-stack development. I customized and optimized e-commerce platforms, handled frontend and backend development, and enhanced user experience. I also trained teams. The successful launch of Jeevaniya Naturals' e-commerce website underscores my ability to deliver quality software solutions.

Projects

Meal Planner App

🔗 <https://mealplanner.brijesh.app/>

Creating your own recipes can be a hassle sometimes. But now, with our recipe maker, you can craft your own recipes easily and without any complications. All you need to do is input the name of your recipe, and you're all set!

Portfolio App

🔗 <https://portfolio.brijesh.app/>

The Portfolio Application is developed using React and TypeScript. It highlights responsive design and user experience and is available on various devices, demonstrating contemporary web development and design skills.

Weather Forecast App

🔗 <https://weather-forecast-app-ashen.vercel.app/>

This web app offers a detailed weather forecast for global cities. It's built with Next.js, TypeScript, React, and Tailwind CSS, providing real-time data and a modern, responsive UI.

Responsive UI App

🔗 <https://responsive.brijesh.app/>

This project developed a responsive UI application using React JS, TypeScript, and styled-components. The application adapts to various devices and screen sizes, ensuring a consistent user experience.
